

Creates a second skin which reduces or eliminates bruising, and tearing of the skin

SAMARITAN is the next frontier in hemorrhage control in less than optimal prehospital settings such as the battlefield, car accident, or scene of traumatic incident.

## INFUSIBLE HEMOSTATIC AGENT

- **HEMORRHAGE CONTROL SYSTEM SEVEN (7)**

Positive Samaritan Outcomes: A single hemostatic agent unlike any other in the world:

1. Zero Shock Extension
2. Zero Pathogens
3. Zero Exothermic Reaction
4. Zero Off Gassing
5. Zero Side Affects
6. Zero Waste
7. Zero Blood Loss

- **DATABASE MANAGEMENT**

Easily fits in current Issued IFAK or similar med bags.  
Comes with 3 -50 ml replaceable Tubes & Mixing 3 Tips

## TECHNOLOGY SOLUTIONS & ADVANCED CAPABILITIES THAT WORK TO SAVE LIVES

The "Samaritan" seconds to cure technology can be extended for use on complex levels and will reduce killed in action (KIA) rates, provide new therapeutic tools for paramedics, and increase life-saving capability for the medic. Samaritan is a game-changing hemorrhage control product designed for the greater good; to improve the survivability outcomes with dynamic components compatible with human physiology for rapid deployment in combat casualty care, disaster/first response, school shootings as well as civilian trauma and emergency medicine.

Samaritan is a proprietary rapidly curing unique composition used primarily to stop bleeding, seal and stabilize wounds, and to preserve the injured area for further medical treatment. Samaritan can be deployed in a wide spectrum of uses, from superficial burns, tears, or abrasions, to lacerations, cut/stab and gunshot wounds, and even (sub)amputations and arterial bleeds.
